API STANDARDS: INTERNATIONAL USAGE & DEPLOYMENT

API published a 2020 report on standards usage in countries where the oil and natural gas industry is established and where the industry has growth potential. This report expands upon a 2010 report that found widespread use of API standards around the globe. This 2020 API report, which covers additional markets, confirms that API standards are actively used around the world.

25 MARKETS ANALYZED

China and SE Asia
India and the Middle East
South America
Africa
