

# THE ENVIRONMENTAL PARTNERSHIP WORKING TOGETHER

## to Improve our Environmental Performance.

The Environmental Partnership's mission is to continuously improve the industry's environmental performance. We do that by taking action, learning together about best practices and technologies, and fostering collaboration in order to responsibly develop our nation's essential oil and natural gas resources.

The Partnership's focus is on reducing air emissions, both methane and volatile organic compounds, from the sources that comprise a majority of emissions within the oil and natural gas production sector.

### WHAT'S THE POWER BEHIND THE PARTNERSHIP?

The Environmental Partnership is comprised of oil and natural gas companies of all sizes operating across the country. Companies who join become part of a meaningful effort to continue reducing our industry's environmental footprint.

Participating companies have access to some of the industry's most innovative and knowledgeable experts on the best methods and technologies to support the responsible development of our nation's energy resources.

Large-scale challenges require comprehensive solutions. Oil and natural gas companies can go it alone or work collaboratively with their peers. The Environmental Partnership gives companies that opportunity. For more information about joining The Environmental Partnership, please reach out through the Contact Page on our website, [TheEnvironmentalPartnership.org](http://TheEnvironmentalPartnership.org)

#### THE PARTNERSHIP IS ORGANIZED AROUND THREE PRINCIPLES:

**1 TAKING ACTION:** The Participating companies are implementing programs that achieve significant emissions reductions.

##### These include:

- + A Leak Detection and Repair Program for Oil and Gas Production Sources
- + A Program to Replace, Remove or Retrofit High-Bleed Pneumatic Controllers
- + A Program for Monitoring Manual Liquids Unloading for Gas Production Sources

**2 LEARNING:** We are holding regular industry workshops to foster operator-to-operator information sharing about best practices and new technologies.

**3 COLLABORATING:** The Partnership's conferences strengthen connections with stakeholder groups, allowing us to share information on new academic research, program learnings, and the latest technological developments.

# THE POWER OF PARTNERS.

**ENVIRONMENTAL RESPONSIBILITY** is everybody's business. It's our mission, and our passion, to continuously improve the natural gas and oil industry's environmental performance, acting as one. By taking action, learning and sharing best practices and technologies, and fostering collaboration, we're able to responsibly develop our nation's essential resources. It's the power of partners, leading the way. The only thing missing is you. Join us.
